

Attention Installer or Homeowner!

Follow these guidelines to prevent damage to your new window grilles

- Store all window grilles in a dry environment, before and after finishing the interior wood surfaces prior to installation.
- Extreme care is to be used during handling to prevent damage to the wood surfaces.
- Apply the paint primer/ or stain and then the finish top coating for full protection.

 **DO NOT** use water based paint primer or water based stain on this grille. Water based products may cause warping of the wood components and damage to the structure of the window grille... 

Using water based finish products voids the PWD Service Warranty.

- Finish the interior wood surfaces *as soon as possible* after receipt and store window grilles in the delivery containers until this step is started.
- After finish application, lay window grilles flat until paint/ stain [sealer coat] finish application has cured.
- No consideration for any warranty claims will be given if the window grille is not finished coated [paint or stain] prior to installation.
- Proper installation is required to prevent damage to the window grille.
- Contact your sales representative at PWD Service with any questions.
